## CAREER OBJECTIVE

Seeking a software developer position with Concept Software & Services where my education, qualifications, and acquired skills will be utilized to their best to improve the company's overall performance. With a commitment to continuous improvement, I am ready to embrace challenges and grow alongside Concept Software & Services.

## PROJECTS

### ■ Dreams Trip

#### Car booking application

[Live-Preview](#)   [Github-Frontend](#)   [Github-Backend](#)

- There are two types of roles in this application are admin and user.
- Admins can add, edit, update, and delete cars, as well as manage bookings and handle car returns.
- Users can book cars for two types of rental: hourly and daily. They can also choose between self-driving and company-provided drivers.
- Implement search and filter features.
- Integrate Aamarpay payment system for booking payment.

I've developed more features in this application. Please explore the GitHub repository and the live preview.

### ■ TTT-Zone

#### Tech tips and tricks zone

[Live-Preview](#)   [Github-Frontend](#)   [Github-Backend](#)

- Register and Login System.
- Users can create and update their profiles, as well as share tech-related content.
- Users can follow other tech enthusiasts, comment on content, and upvote or downvote content.
- Users can subscribe monthly, for 6 months, or for 1 year to access premium posts. Subscribers receive a verified badge.
- Users can generate PDFs of their own tech guides or those created by other users, and share content on social media.
- Implement search and filter features.
- Integrate Aamarpay payment system for subscriptions.

I've developed more features in this application. Please explore the GitHub repository and the live preview.
